DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of the second species (claims 1-16 and 21-25) in the reply filed on 11/30/04 is acknowledged.

Information Disclosure Statement

The information disclosure statements (IDS) submitted on 9/30/03 have been considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 21 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Okada et al. (6,534,397).

With respect to claim 1, Okada et al. disclose forming an insulation film (13/14/15) on a substrate (11); forming a photoresist pattern (18) on the insulation film (Col. 10, lines 35-40); performing a first etching process (Fig. 2F) comprising etching the insulation film using the photoresist pattern as a mask to form an initial trench (20) in the

Application/Control Number: 10/673,873

Art Unit: 2823

insulation film (Col. 10, lines 44-50); and subsequently performing a second etching process that is distinct from said first etching process, said second etching process comprising etching the insulation film in which the initial trench (20) has already been formed to thereby enlarge the initial trench (Col. 11, lines 39-45).

With respect to claim 2, Okada et al. disclose further comprising removing the photoresist pattern after the initial trench is formed and prior to the second etching process (Col. 11, lines 3-10).

With respect to claim 3, Okada et al. disclose wherein said enlarging the initial trench comprises increasing a width of the initial trench while maintaining a depth of the initial trench (See Fig. 2H and 2I).

With respect to claim 4, Okada et al. disclose wherein said forming of the insulation film comprises forming one of an oxide and a fluoride film on the substrate (Col. 3, lines 5-6).

With respect to claim 21, Okada et al. disclose forming an insulation film (13/14/15) on a substrate (11); forming a photoresist pattern (18) on the insulation film (Col. 10, lines 35-40); performing a first etching process (Fig. 2F) comprising etching the insulation film using the photoresist pattern as a mask to form an initial trench (20) in the insulation film (Col. 10, lines 44-50); and subsequently performing a second etching process that is distinct from said first etching process, said second etching process comprising etching the insulation film in which the initial trench (20) has already been formed to thereby enlarge the initial trench (Col. 11, lines 39-45); and depositing a

Application/Control Number: 10/673,873

Art Unit: 2823

conductive material in the enlarged trench to form a conductive pattern (26) in the

insulation film (Col. 11, line 63-Col. 12, line 21).

With respect to claim 24, Okada et al. disclose wherein said material deposited in

the enlarged trench comprises copper (Col. 11, line 65).

Allowable Subject Matter

Claims 5-16, 22, 23 and 25 are objected to as being dependent upon a rejected

base claim, but would be allowable if rewritten in independent form including all of the

limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject

matter: there is no disclosure in the prior art of the limitations recited in claims 5-16, 22,

23 and 25.

Conclusion

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michelle Estrada whose telephone number is 571-272-

1858. The examiner can normally be reached on Monday through Friday.

Art Unit: 2823

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olik Chaudhuri can be reached on 571-272-1855. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-2800.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
